

1. How do you ensure accessibility compliance when integrating JavaScript libraries into web applications?

- A) By ignoring accessibility guidelines
- B) By following web accessibility standards, using ARIA roles, and testing with screen readers and other assistive technologies**
- C) By using only plain HTML
- D) By minimizing the use of JavaScript

2. Which image format supports transparency and is commonly used for web graphics and images with transparent backgrounds?

- A) PSD
- B) PNG**
- C) JPG
- D) GIF

3. Explain the difference between the == and === operators in JavaScript.

- A) == compares values; === compares values and types**
- B) compares values and types; - compares only values

4. What are logical operators?

- A) +, -, *, /
- B) &&, ||, !**
- C) !=,
- D) if, else, switch

5. How do you use the break statement in loops and switches in JavaScript?

- A) To pause execution
- B) To terminate a loop or switch**
- C) To skip an iteration
- D) To continue execution

6. How do you display output in JavaScript?

- A) Using print()
- B) Using alert()**
- C) Using console.log()**
- D) Using document.write()**

7. What are single-line and multi-line comments in JavaScript? How do you comment out code?

- A) // for single-line, /* */ for multi-line**
- B) <!-- --> for single-line, <!-- --> for multi-line
- C) # for single-line, "'''''''''' for multi-line
- D) // for single-line, /** */ for multi-line

8. Select the basic data types in JavaScript

- A) Number, String, Boolean, Object, Array
- B) Number, String, Boolean, Undefined, Null, Object**
- C) Integer, Float, String, Boolean, Object
- D) Char, String, Boolean, Object, Array

9. How do you check the data type of a variable in JavaScript?

- A) typeof variable**
- B) instanceof variable
- C) variable.type
- D) checkType(variable)

10. What are arithmetic operators in JavaScript? Provide examples.

- A) +, -, *, /**
- B) &&, ||, !
- C) ++, -, +, --
- D) ,,!, !-

11. Which keyword is used to declare a variable in JavaScript?

- a) var**
- b) variable
- c) v
- d) let**

12. Which operator is used for strict equality comparison in JavaScript?

- a) ==
- b) !=
- c) ===**
- d) !==

13. Which function is used to output data to the console in JavaScript?

- a) print() b) log() c) display() **d) console.log()**

14. Which built-in method is used to convert a string to an integer in JavaScript?

- a) parseInt()** b) toInteger() c) convertToInt() d) stringToInt()

15. What is the purpose of Tailwind CSS and how does it differ from other CSS frameworks like Bootstrap?

- A) Tailwind CSS is a JavaScript framework
B) Tailwind CSS is a utility-first CSS framework that provides low-level utility classes, while Bootstrap provides pre-designed components
C) Tailwind CSS is used for server-side scripting-
D) Tailwind CSS is a database management tool

16. How do you generate random numbers in JavaScript?

- A) Using Math.random()** C) Using generateRandom()
B) Using random() D) Using getRandom()

17. How do you create a multiline string in JavaScript?

- A) Using double quotes
B) Using single quotes
C) Using backticks
D) Using parentheses

18. What are the let, const, and class keywords introduced in ES6? How do they differ from their ES5 counterparts?

- A) let for block-scoped variables, const for constants, class for classes**
B) let for global variables, const for constants, class for functions
C) let for functions, const for block-scoped variables, class for arrays
D) let for objects, const for global variables, class for constants

18. What is jQuery and what is its main purpose in web development?

- A) A CSS framework
B) A JavaScript library for simplifying HTML DOM manipulation, event handling, and animation
C) A backend framework
D) A database management system

19. What is the purpose of the "alt" attribute in HTML image tags?

- a) It specifies the alignment of the image.
b) It defines the size of the image.
c) It provides alternative text for the image for accessibility.
d) It controls the animation of the image.

20. What is Bootstrap and what role does it play in web design?

- A) A JavaScript framework
B) A CSS framework for building responsive and mobile-first websites
C) A database management system
D) A server-side scripting language

21. Which CSS property is used to control the spacing between lines of text?

- a) text-spacing
b) line-spacing
c) letter-spacing
d) line-height

22. What does the "float" property in CSS do?

- a) It controls the alignment of text within an element.
- b) It removes an element from the normal flow of the document and positions it to the left or right of its containing element.**
- c) It makes an element visible or hidden.
- d) It rotates an element clockwise or counterclockwise.

23. What does the "z-index" property in CSS control?

- a) It controls the size of an element.
- b) It controls the position of an element in the stacking order.**
- c) It controls the opacity of an element.
- d) It controls the rotation of an element.

24. Which HTML tag is used to define a table row?

- a) <tr>**
- b) <td>
- c) <th>
- d) <table>

25. What does the method `querySelector()` do in JavaScript?

- a) It selects multiple elements based on a class name.
- b) It selects the first element based on a CSS selector.**
- c) It selects an element based on its ID.
- d) It selects all elements of a specific tag name.

26. Which software is best for creating documents?

- a) Microsoft Word**
- b) Adobe Photoshop
- c) VLC Media Player
- d) Google Chrome

27. What is the primary use of Microsoft Excel?

- a) Editing videos
- b) Creating spreadsheets**
- c) Browsing the internet
- d) Playing games

28. What is the purpose of the 'Track Changes' feature in Microsoft Word?

- a) To count words
- b) To edit images
- c) To review and manage document edits**
- d) To change font size

29. Which tool in MS Word is used to create a list?

- a) Bold
- c) Text Alignment
- b) Bullet points**
- d) Font Size

30. Which of these is NOT a primary color in RGB?

- a) Red
- c) Yellow**
- b) Blue
- d) Green

31. Which tool is used to remove a background in Photoshop?

- a) Clone Stamp
- c) Dodge Tool
- b) Magic Wand**
- d) Healing Brush

32. What is the function of the Pen Tool in Adobe Illustrator?

- a) To paint freehand
- c) To erase elements
- b) To create precise vector paths and shapes**
- d) To adjust brightness

33. Which of these is NOT part of workplace safety?

- a) Following safety protocols
- c) Ignoring minor hazards**
- b) Using PPE
- d) Reporting unsafe conditions

34.What is the most effective way to communicate in a professional setting?

- a) Using informal language
- b) Being clear and concise**
- c) Using slang and abbreviation
- d) Avoiding eye contact

35.Why is active listening important in workplace interaction?

- a) It helps in avoiding work
- b) It ensures clear understanding and better collaboration**
- c) It makes communication difficult
- d) It reduces teamwork

36.How do you perform basic input validation in JavaScript?

- A) Using if-else statements**
- B) Using switch statements
- C) Using try-catch blocks
- D) Using alert() and prompt()

37.How do you concatenate strings in JavaScript?

- A) Using + operator**
- B) Using operator
- C) Using & operator
- D) Using operator

38.What is Bootstrap and what role does it play in web design?

- A) A JavaScript framework
- B) A CSS framework for building responsive and mobile-first websites**
- C) A database management system
- D) A server-side scripting language

39.What is Axios and what is its main purpose?

- A) A CSS framework
- B) A promise-based HTTP client for making HTTP requests**
- C) A JavaScript library for DOM manipulation
- D) A database management tool

40.How can you troubleshoot and debug issues related to JavaScript libraries in a web application?

- A) By using print statements
- B) By using developer tools, console logs, and debugging tools like breakpoints and stack traces**
- C) By restarting the browser
- D) By reinstalling the libraries
